## 💻 SKILLS

Backend: Node.js, Express.js, MongoDB    ● ● ● ● ●

Frontend: React.js, HTML, CSS, Bootstrap, JavaScript

Version Control: Git, GitHub    Version Control: Git, GitHub

UI/UX: Responsive Design, Animations, Twinkling Effects

## 👤 PROFILE

"Passionate Full-Stack Developer with experience in building dynamic web applications using JavaScript, Node.js, and the MERN stack. Developed a full-featured e-commerce store, FashionNest. Skilled in backend development, APIs, and real-time applications. Currently exploring advanced Node.js concepts and looking for internship opportunities."

## 📝 DECLARATION

## 💼 PROFESSIONAL EXPERIENCE

### Full-Stack Developer | Freelance |

present

- Developed **FashionNest**, a fully functional e-commerce store with **user authentication, cart system, and order management**.
- Built an **AI-powered Code Explainer** that helps developers understand code snippets.
- Created multiple **fun and interactive websites**, such as *The Useless Fact Machine* and *Random Life Advice Generator*.
- Designed and deployed a **React-based Notes App** with Node.js backend.
- Optimized **backend performance** using middleware, caching, and efficient database queries.

## 🔑 INTERESTS

- Primary Focus: Full-Stack Development (MERN)
- Currently Learning: Advanced Node.js, Next.js, AI-powered tools
- Interests: Web Development, AI

## 📁 PROJECTS

### Notes App (React + Node.js)

A full-stack note-taking application with user authentication and CRUD operations.

### FashionNest (E-commerce Store)

Full MERN stack e-commerce website with user authentication, cart system, and real-time updates.

### Fun Website

Click and get random, thought-provoking (or totally useless) life advice.

### Real-Time Store

A shopping experience with real-time features

## 🎓 EDUCATION

### 🎓 BS Software Engineering (BSSE) | In Progress
